# ENTERPHONE SLIMLINE™ PANEL

The Slimline is Viscount's traditional Enterphone® 2000 panel for admitting guests to multi-family complexes. Viscount has been manufacturing Enterphone systems since 1964 and the Slimline panel was first released in 1966. This makes the Slimline the perfect panel to be used when upgrading older Enterphone I, Enterphone II, Enterphone MKIII, and Enterphone IIIS models.

## Enterphone 2000

To work, the Slimline panel must be connected to an Enterphone 2000 control unit in the phone room. The Enterphone 2000 controller is a type of phone switch which saves the building owner money while providing numerous benefits to the residents. Please refer to the separate Enterphone 2000 brochure for a full summary. A few benefits are listed below:

- "No phone bill" technology bypasses the need for a dedicated commercial phone line to operate the system
- Individual residents can use any phone as an intercom even if they don't have phone service
- Built-in call waiting prevents missed calls and confusion
- Distinctive ring differentiates Enterphone from regular phone calls
- Unique programming settings save building manager the hassle of changing codes when residents move
- Special functions such as outside dialing options for remote locations and cell phones

## FEATURES

### Slimline Panel Benefits

- Exact replacement for older Enterphone systems going back to 1966
- Small width allows the panel to be mounted in narrow spaces
- Unique individual magnetic strip directories allow simple organization of names
- In-use light indicates busy system status
- Built-in postal lock switch
- Unobtrusive 2" depth allows surface or flush mounting

### Part Numbers

- **50-0632-11-1** - Spk/Mic-Silver
- **50-0632-13-1** - Directory-c/w Magnetic Strips & Letters Kit (55 line capacity)-Silver

*Directory*
