ENTERPHONE CLASSIC™ PANEL

The Classic is Viscount's premium Enterphone® 2000 entry control panel for admitting guests to multi-family complexes. The Classic panel features oversized 1" keypad buttons to assist seniors and the handicapped in using the system. The separate directory kit includes Viscount's unique individual magnetic name strips to allow simple re-organization.

The thin footprint of the Classic panel allows it to be surface mounted while projecting an almost flush mount appearance.

Enterphone 2000

To work, the Classic panel must be connected to an Enterphone 2000 control unit in the phone room. The Enterphone 2000 controller is a type of phone switch which saves the building owner money while providing numerous benefits to the residents. Please refer to the separate Enterphone 2000 brochure for a full summary. A few benefits are listed below:

- "No phone bill" technology bypasses the need for a dedicated commercial phone line to operate the system
- Individual residents can use any phone as an intercom even if they don't have phone service
- Built-in call waiting prevents missed calls and confusion
- Distinctive ring differentiates Enterphone from regular phone calls
- Unique programming settings save building manager the hassle of changing codes when residents move
- Special functions such as outside dialing options for remote locations and cell phones
